

Alaska BROWN BEAR HUNTS

We offer a personal one on one hunting guide service with our 10 day Alaska Brown Bear hunts, only taking 2 to 4 hunters at a time to ensure you the best opportunities to see and choose from as many trophy Alaskan brown bears as possible. The average size of our bears are 8½ to 9½' in this part of the state. Typically this is the largest size you will find in this area of Southeast Alaska. You will see the most Brown Bears in this part of Alaska, as we have the highest recorded density in the state of Alaska on what are known as the ABC Islands: Admiralty, Baranof, and Chichigof Islands of South East Alaska. We have guide use areas on Baranof Island. You will likely see at least 20 different bears while hunting, and most of the time a lot more, sometimes 40-50 bears.

We'll anchor in a quiet, secluded cove or bay and use our seaworthy 16' aluminum boats to reach our hunting areas each day, returning each evening to the yacht for delicious meals and relaxing accommodations while you share stories of your adventures.
